Hoapa — Contact map: Greater Helsinki academics

A working contact list of scholars in the Greater Helsinki region (University of Helsinki, Aalto University, and a few adjacent institutions) whose work touches the concepts Hoapa draws on. Compiled 2026-06-11 for outreach (cf. `targeted_emails.md`, `email.md`).

How to read this

- **Scope.** Greater Helsinki region, as agreed: primarily University of Helsinki (UH) and Aalto University, with the institution named per entry. A short appendix lists a handful of strongly-linked people *outside* the region for reference.
- **"Link" is deliberately loose.** Many entries are thematic neighbours, not people already working on this exact synthesis. That is intentional — the brief was to be liberal about what counts as a connection.
- **Emails.**
  - ✓ **verified** — taken from the person's public research-portal profile (researchportal.helsinki.fi exposes the address).
  - **~ inferred** — constructed from the institutional pattern (`firstname.lastname@helsinki.fi` / `@aalto.fi`) and **not** individually verified. Aalto profiles hide the address behind a contact form, so **all Aalto emails are inferred.** Double-check inferred addresses before sending; a few UH staff use a middle initial or a non-standard local-part.
- **Links** go to the person's research-portal profile (UH: `researchportal.helsinki.fi`; Aalto: `research.aalto.fi`), which is the most stable public page and usually carries current contact details, publications, and CV links.
- Roles/seniority span professors to doctoral researchers (you asked to include everyone). Emeritus/visiting status is noted where known.

Counts: ~115 names total — Mathematics & Logic ~33, Philosophy ~17, Engineering/CS ~30, Social Sciences ~33 (physicists folded into Math & Logic).

---

1. Mathematics & Logic

The closest disciplinary home: foundations of mathematics, categorical/modal logic, model theory, proof theory, and the mathematical-physics neighbours of the project's "field-theoretic dynamics / RG flow" layer.

Logic, set theory, model theory, foundations (Helsinki Logic Group)

This is the single most relevant cluster: foundations of mathematics, set theory, model theory, and dependence/team logic (a generalised-quantifier, "data carries the structure" sensibility close to the project's session-value leg).

- **Jouko Väänänen** — Research Director, Dept. of Mathematics & Statistics, UH — jouko.vaananen@helsinki.fi ✓ — profile
  Link: set theory, dependence logic, foundations of mathematics — the leader of the foundations conversation Hoapa positions itself within (HoTT-as-foundation vs. praxis).
- **Juliette Kennedy** — University Lecturer / Docent, Math & Statistics, UH — juliette.kennedy@helsinki.fi ✓ — profile
  Link: philosophy of mathematics and set-theoretic model theory; works on Gödel, formalism, and "what foundations are for" — directly the Hersh/Grothendieck axis of the project.
- **Juha Kontinen** — Professor, Math & Statistics, UH — juha.kontinen@helsinki.fi ✓ — profile
  Link: finite model theory and dependence logic; team semantics formalises "information distributed across assignments," kin to typed-data-across-agents.
- **Miika Hannula** — Docent / University Researcher, Math & Statistics, UH — miika.hannula@helsinki.fi ✓ — profile
  Link: dependence logic and database dependency theory — logic of structured information, the SessionValues register in a logical key.
- **Åsa Hirvonen** — Senior University Lecturer / Docent, Math & Statistics, UH — asa.hirvonen@helsinki.fi ✓ — profile
  Link: model theory of metric structures — "local approximations gluing into a structure," a model-theoretic cousin of sheaf-locality.
- **Tapani Hyttinen** — University Lecturer / Docent, Math & Statistics, UH — tapani.hyttinen@helsinki.fi ✓ — profile
  Link: abstract model theory, stability — the machinery of "structure determined by relations," Yoneda-adjacent in spirit.
- **Matti Pauna** — University Researcher, Math & Statistics, UH — matti.pauna@helsinki.fi ✓ — profile
  Link: non-wellfounded sets and coalgebra-flavoured set theory + math education — the comonad/coalgebra hint in `motivation.md`.
- **Juha Oikkonen** — Professor emeritus, Math & Statistics, UH — juha.oikkonen@helsinki.fi ✓ — profile
  Link: infinitary logic and mathematics-teacher education; bridges foundations and pedagogy (the project's transparency/pedagogy strand).
- **Aapo Halko** — Ph.D., descriptive set theory, UH (Logic Group) — aapo.halko@helsinki.fi ~ — group page
  Link: descriptive set theory — definability and hierarchy of "shapes of information."
- **Ulla Karhumäki** — Postdoc, model theory, UH (Logic Group) — ulla.karhumaki@helsinki.fi ~ — group page
  Link: model theory of groups — structure recovered from algebraic relations.
- **Miguel Moreno** — Postdoc, generalised descriptive set theory, UH (Logic Group) — miguel.moreno@helsinki.fi ~ — group page
  Link: classification theory; "how much structure is needed to tell things apart" — the counit/non-collapse intuition.
- **Ur Ya'ar** — Postdoc, set theory, UH (Logic Group) — ur.yaar@helsinki.fi ~ — group page
  Link: iterated forcing / models of set theory — iteration and fixed points, the recursion engine of the arc.
- **Teemu Hankala** — Doctoral researcher, logic/complexity, UH (Logic Group) — teemu.hankala@helsinki.fi ~ — group page
  Link: logic and computational complexity of dependence logics.

- **Matilda Häggblom** — Doctoral researcher, UH (Logic Group) — matilda.haggblom@helsinki.fi ~ — group page
  Link: team semantics / modal dependence logic.
- **Max Sandström** — Doctoral researcher, temporal/team logic, UH (Logic Group) — max.sandstrom@helsinki.fi ~ — group page
  Link: temporal team logics — time-indexed structured information, close to session/causal ordering.

Logicians in the Philosophy department (proof theory & logic)

- **Gabriel Sandu** — Professor emeritus, Theoretical Philosophy, UH — gabriel.sandu@helsinki.fi ✓ — profile
  Link: game-theoretic semantics and the logic of games — "meaning as interaction between agents," a direct conceptual rhyme with the actor/perspective adjunction.
- **Sara Negri** — Professor / Docent, Theoretical Philosophy, UH (now also Univ. of Genoa) — sara.negri@helsinki.fi ✓ — profile
  Link: structural **proof theory**, modal and non-classical logic, constructivism — the proof-theoretic backbone of any modal type theory; strongly aligned with the Agda/proof-checked side.
- **Jan von Plato** — Research Director / emeritus, Theoretical Philosophy, UH — jan.vonplato@helsinki.fi ✓ — profile
  Link: proof theory, constructivism, history of logic (Gentzen, Gödel) — the lineage behind Benton's LNL and natural-deduction structure the project uses.

Mathematical physics / field theory (the "field-theoretic dynamics" link)

The project's RG-flow / factorization-algebra layer borrows from QFT; these are the people whose mathematics that layer leans on.

- **Antti Kupiainen** — Research Director, Math & Statistics, UH — antti.kupiainen@helsinki.fi ✓ — profile
  Link: renormalization group, constructive QFT, multiplicative chaos — the rigorous RG that the "RG flow with reflexive insertions" metaphor wants to become.
- **Kalle Kytölä** — Professor, Math & Systems Analysis, Aalto — kalle.kytola@aalto.fi ~ — profile
  Link: conformal field theory, SLE, representation theory and quantum groups — CFT/algebra exactly where the field-theoretic and categorical strands meet.
- **Jani Lukkarinen** — University Lecturer / Docent, Math & Statistics, UH — jani.lukkarinen@helsinki.fi ✓ — profile
  Link: mathematical physics, kinetic theory, scaling limits — macroscopic laws emerging from local interaction (the locality → globality theme).
- **Paolo Muratore-Ginanneschi** — Docent, Math & Statistics, UH — paolo.muratore-ginanneschi@helsinki.fi ✓ — profile
  Link: stochastic thermodynamics, optimal control, open quantum systems — control/optimality language adjacent to the "optimality secured by separation" claim.
- **Eero Saksman** — Professor, Math & Statistics, UH — eero.saksman@helsinki.fi ✓ — profile
  Link: analysis and probability around Gaussian multiplicative chaos / RG — collaborator territory of the math-physics cluster above.
- **Esko Keski-Vakkuri** — Senior University Lecturer / Docent, Physics, UH — esko.keski-vakkuri@helsinki.fi ✓ — profile

Link: string theory, holography, **quantum information theory** — dualities and information-geometric structure (the adjunction/duality motif).

- **Kari Rummukainen** — Professor, Physics, UH — kari.rummukainen@helsinki.fi ✓ — profile
  Link: lattice gauge theory, computational field theory — discretised field theory on a lattice/site, a literal "fields on a site" picture.
- **Aleksi Vuorinen** — Professor, Physics, UH — aleksi.vuorinen@helsinki.fi ✓ — profile
  Link: thermal/perturbative QFT — the working QFT machinery behind the dynamics layer.
- **Anca Tureanu** — Professor, Physics, UH — anca.tureanu@helsinki.fi ✓ — profile
  Link: noncommutative QFT, symmetry — noncommutative geometry touches the topos/algebra side.
- **Masud Chaichian** — Professor emeritus, Physics, UH — masud.chaichian@helsinki.fi ✓ — profile
  Link: QFT, symmetry and noncommutative structures — senior figure in the same space.
- **Syksy Räsänen** — Senior Researcher / Docent, Physics, UH — syksy.rasanen@helsinki.fi ✓ — profile
  Link: cosmology + active in science–society / philosophy-of-physics discussion — a bridge to the interpretive register.
- **Päivi Törmä** — Professor, Applied Physics, Aalto — paivi.torma@aalto.fi ~ — profile
  Link: many-body quantum physics, topological/flat-band systems — topology-of-states, a loose cohesion analogue.

Geometry, analysis, algebra & coding theory

Looser links via "spaces, cohesion, gluing" and the coding-theoretic side of information transfer.

- **Kari Astala** — Professor emeritus, Math & Statistics, UH — kari.astala@helsinki.fi ✓ — profile
  Link: geometric analysis, quasiconformal mappings — deformation/structure-preservation between spaces.
- **Ilkka Holopainen** — Docent / University Lecturer, Math & Statistics, UH — ilkka.holopainen@helsinki.fi ✓ — profile
  Link: analysis on manifolds and metric spaces, differential geometry — the "spatial/cohesive" intuition in concrete form.
- **Tuomas Sahlsten** — Associate Professor, Math & Statistics, UH — tuomas.sahlsten@helsinki.fi ✓ — profile
  Link: metric geometry, quantum chaos, mathematical physics — geometry/physics crossover.
- **Erik Elfving** — University Lecturer / Docent, Math & Statistics, UH — erik.elfving@helsinki.fi ✓ — profile
  Link: **topology, transformation groups** — the closest UH-math person to category/topology language; transformation groups ≈ symmetry actions.
- **Tuomas Hytönen** — Professor (now Aalto), formerly UH Math & Statistics — tuomas.hytonen@helsinki.fi ✓ / tuomas.hytonen@aalto.fi ~ — profile
  Link: harmonic analysis, operator theory; rigorous-analysis sensibility valued for the proof side.
- **Camilla Hollanti** — Professor, Math & Systems Analysis, Aalto — camilla.hollanti@aalto.fi ~ — profile
  Link: algebraic coding theory, distributed storage, physical-layer security — **typed/encoded data for robust transfer**, the SessionValues claim in coding-theory form.
- **Kaie Kubjas** — Associate Professor, Math & Systems Analysis, Aalto — kaie.kubjas@aalto.fi ~ — profile
  Link: algebraic geometry / applied algebra — concrete categorical-algebraic structure.
- **Ragnar Freij-Hollanti** — University Lecturer, Math & Systems Analysis, Aalto — ragnar.freij@aalto.fi ~ — profile

Link: combinatorics, coding theory, matroids — discrete structure of information.

- **Lasse Leskelä** — Associate Professor, Math & Systems Analysis, Aalto — lasse.leskela@aalto.fi ~ — profile
  Link: random graphs and stochastic processes on networks — "macroscopic laws of large random networks," the developing-network leg.

---

2. Philosophy

UH philosophy is analytically oriented and unusually strong in philosophy of science, social ontology, pragmatism, and philosophy of mathematics — several of these map onto Hoapa's univocity/perspectivism and Peirce/Spinoza threads.

Philosophy of mathematics & logic

- **Markus Pantsar** — Researcher/Docent, Theoretical Philosophy, UH — markus.pantsar@helsinki.fi ✓ — profile
  Link: **philosophy of mathematics**, foundations, mathematical cognition — directly on "what mathematics is and how it is practised," the project's headline conjecture.
- **Ilkka Niiniluoto** — Professor emeritus (former Rector), Theoretical Philosophy, UH — ilkka.niiniluoto@helsinki.fi ✓ — profile
  Link: scientific realism, philosophy of science and logic, abstract entities — a senior interlocutor for the realism/objectivity-as-coherence reading.
- **Anssi Korhonen** — University Lecturer, Theoretical Philosophy, UH — anssi.korhonen@helsinki.fi ✓ — profile
  Link: history of logic and analytic philosophy (Russell), philosophy of logic — the conceptual genealogy of type/relation.

Pragmatism, Peirce & semiotics

The manifesto explicitly invokes Peirce; this is a live UH strength.

- **Sami Pihlström** — Professor, Theoretical Philosophy / Philosophy of Religion, UH — sami.pihlstrom@helsinki.fi ✓ — profile
  Link: **pragmatism** (Peirce, James, Dewey), realism vs. anti-realism — the pragmatist lineage Hoapa lists among its precursors.
- **Henrik Rydenfelt** — Associate Professor, Practical Philosophy / Media, UH — henrik.rydenfelt@helsinki.fi ✓ — profile
  Link: **Peircean pragmatism, semiotics, communication ethics, public discourse** — almost a precise overlap: signs, inquiry, and norms of communication.

Philosophy of science, social ontology & social epistemology

- **Uskali Mäki** — Professor emeritus, founder of TINT, UH — uskali.maki@helsinki.fi ✓ — profile
  Link: philosophy of economics and social science, **social ontology, models, interdisciplinarity** — TINT is the home for "how disciplines model and combine," directly the methodology claim.
- **Caterina Marchionni** — University Lecturer, Practical Philosophy (TINT), UH — caterina.marchionni@helsinki.fi ✓ — profile

Link: philosophy of the social sciences, interdisciplinarity, models — the epistemics of cross-disciplinary integration.

- **Jaakko Kuorikoski** — Professor, Practical Philosophy, UH — jaakko.kuorikoski@helsinki.fi ✓ — profile
  Link: explanation, causality, **modelling and simulation, mechanisms** — how formal models earn their interpretive keep (the "math must earn the philosophy" line).
- **Petri Ylikoski** — Professor, Sociology / Practical Philosophy (STS), UH — petri.ylikoski@helsinki.fi ✓ — profile
  Link: analytical sociology, **science & technology studies**, social theory, mechanisms — sits exactly on the math/CS ↔ social-science bridge the project needs.
- **Inkeri Koskinen** — Researcher, Practical Philosophy, UH — inkeri.koskinen@helsinki.fi ✓ — profile
  Link: social epistemology, values in science, **democratisation of knowledge production, objectivity** — objectivity-as-coherence-across-perspectives, a core interpretive claim.
- **Säde Hormio** — Researcher, Practical Philosophy, UH — sade.hormio@helsinki.fi ✓ — profile
  Link: **collective responsibility / collective agency** and ignorance — the ethics of unityped collectives.
- **Ilmari Hirvonen** — Doctoral researcher, Theoretical Philosophy, UH — ilmari.hirvonen@helsinki.fi ✓ — profile
  Link: philosophy of science, demarcation, epistemology of modality, metaphilosophy — the modality/possibility angle.

Ethics & meta-ethics (legitimacy, norms)

- **Antti Kauppinen** — Professor, Practical Philosophy, UH — antti.kauppinen@helsinki.fi ✓ — profile
  Link: metaethics, normativity, well-being — the normative grounding of "legitimacy, trust, fairness."

Phenomenology, Wittgenstein & history of philosophy

- **Mirja Hartimo** — Associate Professor, Theoretical Philosophy, UH — mirja.hartimo@helsinki.fi ✓ — profile
  Link: **Husserl and the phenomenology / philosophy of mathematics** — a continental complement to the foundations debate; how mathematical objectivity is constituted.
- **Hanne Appelqvist** — Docent / researcher, Aesthetics & Philosophy, UH — hanne.appelqvist@helsinki.fi ✓ — profile
  Link: Wittgenstein, Kant, philosophy of language and form — limits of expression/transparency, the Bulk-layer language question.
- **Thomas Wallgren** — University Lecturer, Practical Philosophy (von Wright archive), UH — thomas.wallgren@helsinki.fi ✓ — profile
  Link: Wittgenstein, philosophy and democracy, critique of modernity — the modernity-vs-specialisation theme from `motivation.md`.
- **Pii Telakivi** — Postdoctoral researcher, Theoretical Philosophy, UH — pii.telakivi@helsinki.fi ✓ — profile
  Link: philosophy of mind, **extended/enactive mind** — cognition distributed across a system, kin to distributed-agent cognition.

---

3. Engineering / Computer Science

Helsinki-area CS is strong in distributed computing, formal methods/verification, and computing-education research; session types / process calculi as such are thin locally, so several links are via concurrency, verification, and the information-theoretic encoding strand.

Concurrency, distributed computing & verification

- **Jukka Suomela** — Associate Professor, Computer Science, Aalto — jukka.suomela@aalto.fi ~ — profile
  Link: theory of **distributed and parallel computing, with emphasis on *locality*** — almost a slogan for the project's "actors act in local frames, content glues globally."
- **Keijo Heljanko** — Professor, Computer Science, UH (formerly Aalto) — keijo.heljanko@helsinki.fi ~ — profile
  Link: **model checking, concurrency, Petri nets / formal verification**, and distributed systems — the verification-of-concurrent-protocols skillset the project most directly needs.
- **Tommi Junttila** — Senior University Lecturer, Computer Science, Aalto — tommi.junttila@aalto.fi ~ — profile
  Link: SAT/SMT, model checking, symmetry reduction — automated verification of state machines/protocols.
- **Juho Hirvonen** — Researcher, Computer Science, Aalto — juho.hirvonen@aalto.fi ~ — profile
  Link: distributed graph algorithms, locality — co-author of the locality programme; local-to-global by design.
- **Jara Uitto** — Assistant Professor, Computer Science, Aalto — jara.uitto@aalto.fi ~ — profile
  Link: distributed and massively parallel computation — scaling local computation to global networks.
- **Pekka Orponen** — Professor, Computer Science, Aalto — pekka.orponen@aalto.fi ~ — profile
  Link: computational complexity, natural/molecular computing, neural computation — foundations of computation across unconventional substrates.
- **Petteri Kaski** — Professor, Computer Science, Aalto — petteri.kaski@aalto.fi ~ — profile
  Link: algorithm theory and algebraic algorithms — the algorithmic/algebraic underpinning.
- **Sasu Tarkoma** — Professor (Dean), Computer Science, UH — sasu.tarkoma@helsinki.fi ✓ — profile
  Link: distributed systems, edge computing, pub/sub messaging — large-scale decentralized communication infrastructure.
- **Jukka K. Nurminen** — Professor, Computer Science, UH — jukka.k.nurminen@helsinki.fi ✓ — profile
  Link: (empirical) software engineering, distributed/energy-aware systems, quantum software — the engineering-practice register.

Security, cryptography & trust

- **Valtteri Niemi** — Professor, Computer Science (security), UH — valtteri.niemi@helsinki.fi ✓ — profile
  Link: cryptography, privacy, mobile-network security — the trust/legitimacy guarantees of a protocol made formal.
- **Chris Brzuska** — Associate Professor, Computer Science, Aalto — chris.brzuska@aalto.fi ~ — profile
  Link: **provable-security cryptography and its links to verification and complexity** — "trust built in rather than bolted on," argued with proofs.
- **Tomi Männistö** — Professor, Computer Science (software systems), UH — tomi.mannisto@helsinki.fi ✓ — profile

Link: software architecture, design decisions, variability — "separation of concerns / its own categorical home" as software-architecture practice.

- **Mikko Raatikainen** — University Researcher, Computer Science, UH — mikko.raatikainen@helsinki.fi ✓ — profile
  Link: software architecture, variability modelling, decision management — the engineering-of-protocols layer.

Programming, types & computing-education research (transparency/pedagogy)

The project makes pedagogy and transparency first-class -ilities; computing-ed research is the natural ally.

- **Lauri Malmi** — Professor, Computer Science, Aalto — lauri.malmi@aalto.fi ~ — profile
  Link: computing-education research, program visualization, automated assessment — making programs *understandable*, the Bulk-layer transparency goal.
- **Juha Sorva** — Senior University Lecturer, Computer Science, Aalto — juha.sorva@aalto.fi ~ — profile
  Link: program comprehension, notional machines, learning to program — "how the unityped receiver understands the message," nearly verbatim.

Data, AI, information theory, HCI & systems

- **Teemu Roos** — Professor, Computer Science, UH — teemu.roos@helsinki.fi ✓ — profile
  Link: **information theory, minimum description length**, ML — receiver-relative encoding cost / information-cohomology strand, exactly.
- **Petri Myllymäki** — Professor, Computer Science, UH — petri.myllymaki@helsinki.fi ✓ — profile
  Link: probabilistic modelling, information-theoretic learning — encoding/compression of structured information.
- **Hannu Toivonen** — Professor, Computer Science, UH — hannu.toivonen@helsinki.fi ✓ — profile
  Link: data mining and **computational creativity / language generation** — the protocol-generates-its-own-language idea.
- **Jyrki Kivinen** — Professor, Computer Science, UH — jyrki.kivinen@helsinki.fi ~ — homepage *(no research-portal page found)*
  Link: learning theory, online learning — formal guarantees on adaptive systems (stability vs. adaptability).
- **Arto Klami** — Professor, Computer Science, UH — arto.klami@helsinki.fi ✓ — profile
  Link: probabilistic machine learning, data fusion — combining heterogeneous local signals into a shared model.
- **Nikolaj Tatti** — University Researcher, Computer Science, UH — nikolaj.tatti@helsinki.fi ✓ — profile
  Link: graph mining, patterns in networks — structure discovery in developing networks.
- **Michael Mathioudakis** — Associate Professor, Computer Science, UH — michael.mathioudakis@helsinki.fi ✓ — profile
  Link: data science on graphs, model management — managing distributed, evolving data structures.
- **Giulio Jacucci** — Professor, Computer Science (HCI), UH — giulio.jacucci@helsinki.fi ✓ — profile
  Link: human–computer interaction, collaborative/ubiquitous systems — the human side of shared protocols.
- **Eero Hyvönen** — Professor, Computer Science (semantic web), UH/Aalto — eero.hyvonen@helsinki.fi ✓ — profile

Link: **knowledge representation, ontologies, linked data** — formally shared vocabularies for a common world, an engineering cousin of the descent/gluing aim.

- **Indrė Žliobaitė** — Associate Professor, Computer Science / Geosciences, UH — indre.zliobaite@helsinki.fi ✓ — profile
  Link: learning in evolving environments (concept drift), evolutionary dynamics — adaptation of a system over time.
- **Laura Ruotsalainen** — Professor, Computer Science, UH — laura.ruotsalainen@helsinki.fi ✓ — profile
  Link: spatio-temporal AI, sensor fusion, smart-city systems — fusing local observations into global situational state.
- **Petteri Nurmi** — Professor, Computer Science, UH — petteri.nurmi@helsinki.fi ✓ — profile
  Link: ubiquitous/distributed sensing systems — local sensing, global inference.
- **Samuel Kaski** — Professor, Computer Science (ML), Aalto — samuel.kaski@aalto.fi ~ — profile
  Link: probabilistic ML, AI-assisted modelling, collaborative/AI agents — multi-agent, human-in-the-loop inference.
- **Antti Ylä-Jääski** — Professor, Computer Science, Aalto — antti.yla-jaaski@aalto.fi ~ — profile
  Link: distributed mobile/edge/cloud systems, end-to-end services — real distributed-systems engineering.
- **Mario Di Francesco** — Associate Professor, Computer Science, Aalto — mario.di.francesco@aalto.fi ~ — profile
  Link: networked/IoT distributed systems — many autonomous nodes coordinating.

---

4. Social Sciences

The community-of-agents / citizen-assembly leg. Helsinki is strong on democratic participation, political sociology, social ontology, the public sphere, and economic theory of cooperation.

Democracy, participation & political theory

- **Emilia Palonen** — Associate Professor, Political Science, UH — emilia.palonen@helsinki.fi ✓ — profile
  Link: **agonistic democracy, populism, discourse theory** (Laclau/Mouffe) — how a shared political world is assembled from plural, conflicting perspectives; close to the perspectivism reading.
- **Teivo Teivainen** — Professor, World Politics, UH — teivo.teivainen@helsinki.fi ✓ — profile
  Link: **participatory democracy, participatory budgeting, World Social Forum**, global democracy — decentralized self-governance at scale, the citizen-assembly-networked wager.
- **Hanna Wass** — Senior University Lecturer / Vice-Dean, Political Science, UH — hanna.wass@helsinki.fi ✓ — profile
  Link: political participation, electoral inclusion, democratic equality — who gets counted and how (the no-ranking principle).
- **Åsa von Schoultz** — Professor, Political Science, UH — asa.vonschoultz@helsinki.fi ✓ — profile
  Link: electoral systems, political behaviour, intra-party competition — institutional design and its incentive effects.
- **Mikko Mattila** — Professor, Political Science, UH — mikko.mattila@helsinki.fi ✓ — profile
  Link: political participation and representation — empirical study of inclusion mechanisms.
- **Anne Holli** — Professor, Political Science, UH — anne.holli@helsinki.fi ✓ — profile
  Link: political institutions, representation, gender and policy-preparation — how representation is

structured (or distorted).

- **Johanna Kantola** — Professor, Gender Studies / Political Science, UH — johanna.kantola@helsinki.fi ✓ — profile
  Link: gender and politics, democratic representation in the EU — power asymmetries inside ostensibly flat structures.
- **Pertti Ahonen** — Professor, Political Science (administration), UH — pertti.ahonen@helsinki.fi ✓ — profile
  Link: governance, public administration, computational text analysis of politics — institutions + data methods.

Social ontology & collective agency (Philosophy ↔ Social science)

A standout cluster for the "univocal agents / collective subject" formalism.

- **Raul Hakli** — University Researcher, Practical Philosophy, UH — raul.hakli@helsinki.fi ✓ — profile
  Link: **social ontology + multi-agent systems / collective agency** (philosophy *and* CS coded) — possibly the single best-matched person: formal models of groups of agents acting as one.
- **Pekka Mäkelä** — University Researcher, Practical Philosophy (TINT), UH — Pekka.A.Makela@helsinki.fi ✓ — profile
  Link: collective intentionality, collective responsibility, trust — the metaphysics of unityped collectives.
- **Tuukka Kaidesoja** — Senior University Lecturer, Practical Philosophy / Sociology, UH — tuukka.kaidesoja@helsinki.fi ✓ — profile
  Link: **critical realism, social ontology, emergence** — how macro-social structure emerges from interactions (locality → globality, socially).
- **Timo Miettinen** — Senior Researcher, European studies / Practical Philosophy, UH — timo.pa.miettinen@helsinki.fi ✓ — profile
  Link: political philosophy, phenomenology (Husserl), European integration — universality vs. plurality in political form.

Sociology, civic life & social theory (incl. systems theory)

- **Eeva Luhtakallio** — Professor, Sociology, UH — eeva.luhtakallio@helsinki.fi ✓ — profile
  Link: political/visual sociology, **civic participation and democracy from below**, pragmatist sociology — empirical study of how flat civic engagement actually works.
- **Veikko Eranti** — Associate Professor, Urban Sociology, UH — veikko.eranti@helsinki.fi ✓ — profile
  Link: civic action, participation, pragmatist/justification sociology, digital participation — micro-mechanics of collective deliberation.
- **Keijo Rahkonen** — Professor, Social policy / sociology, UH — keijo.rahkonen@helsinki.fi ✓ — profile
  Link: social theory (Bourdieu), history of sociological theory — the classical-theory backdrop (incl. systems/field concepts).
- **Lena Näre** — Professor, Sociology, UH — lena.nare@helsinki.fi ✓ — profile
  Link: sociology of work, care, migration, moral economy — how informal orders self-organize.
- **Salla Sariola** — Associate Professor, Sociology (STS), UH — salla.sariola@helsinki.fi ✓ — profile
  Link: science & technology studies, microbial/more-than-human sociology — STS reading of knowledge-making communities.
- **Turo-Kimmo Lehtonen** — (sociology, economic sociology/valuation; recently Tampere — see appendix).

Media, public sphere & communication

The "system that describes a shared world" is a media/public-sphere question too.

- **Risto Kunelius** — Professor, Communication, UH — risto.kunelius@helsinki.fi ✓ — profile
  Link: **public sphere, deliberation, mediated communication**, climate communication — the theory of collective world-description through media.
- **Anu Kantola** — Professor, Communication, UH — anu.kantola@helsinki.fi ✓ — profile
  Link: political communication, **power and elites, public discourse** — how status/hierarchy bends the "flat surface" of communication.
- **Johanna Sumiala** — Professor, Media & Communication, UH — johanna.sumiala@helsinki.fi ✓ — profile
  Link: media anthropology, ritual communication, networked attention — communication as the binding of a community.
- **Mervi Pantti** — Professor, Media & Communication, UH — mervi.pantti@helsinki.fi ✓ — profile
  Link: journalism studies, mediated emotions, humanitarian communication — norms and affect in shared information.
- **Henrik Rydenfelt** — (also here: communication ethics & public discourse — listed under Philosophy/Pragmatism).

Economics, game theory & the theory of cooperation

The "incentives / mechanism / cooperation" engineering of a fair protocol.

- **Hannu Vartiainen** — Professor, Economics, UH — hannu.vartiainen@helsinki.fi ✓ — profile
  Link: microeconomic theory, **mechanism design, game theory, bargaining** — designing rules so that decentralized agents reach good collective outcomes.
- **Klaus Kultti** — Professor, Economics, UH — klaus.kultti@helsinki.fi ✓ — profile
  Link: game theory, matching, search/markets — coordination among many self-interested agents.

Social psychology, trust & behaviour change

- **Jukka Lipponen** — Professor, Social Psychology, UH — jukka.lipponen@helsinki.fi ✓ — profile
  Link: **organizational trust, fairness, identity** — the legitimacy/trust core characteristics, empirically.
- **Nelli Hankonen** — Professor, Social Psychology, UH — Nelli.Hankonen@helsinki.fi ✓ — profile
  Link: behaviour change, self-determination, motivation — how norms and autonomy shape participation.

Economic sociology, consumption & the data economy

- **Mika Pantzar** — Professor, Consumer Society Research Centre, UH — mika.pantzar@helsinki.fi ✓ — profile
  Link: **theory of social practices, the data economy, self-tracking/quantified self** — measurement, datafication, and practice — the information-measurement strand socially.
- **Visa Heinonen** — Professor, Consumer economics / economic history, UH — visa.heinonen@helsinki.fi ✓ — profile
  Link: consumer society, economic culture, history of economic ideas — long-run institutions of exchange.

- **Minna Autio** — Professor, Consumer/economic education, UH — minna.autio@helsinki.fi ✓ — profile
  Link: consumption, sustainability, economic socialization — norms of fair exchange and education.

Development, commons & alternatives to hierarchy

- **Barry Gills** — Professor, Global Development Studies, UH — barry.gills@helsinki.fi ✓ — profile
  Link: world-systems theory, globalization, **democratisation and resistance**, global crisis — macro-history of how hierarchies form and are contested.
- **Markus Kröger** — Associate Professor, Global Development Studies, UH — markus.kroger@helsinki.fi ✓ — profile
  Link: political economy, **natural-resource politics, world-ecology, the commons** — governance of shared resources without central authority.
- **Eija Ranta** — Associate Professor, Global Development Studies, UH — eija.ranta@helsinki.fi ✓ — profile
  Link: **decoloniality, *buen vivir*, alternatives to development** — non-hierarchical, plural models of the good collective life.

Network science (computational social science)

- **Jari Saramäki** — Professor, Computer Science / complex systems, Aalto — jari.saramaki@aalto.fi ~ — profile
  Link: **complex networks, temporal networks, social networks** — the mathematics of evolving communities; the "developing infinite network."
- **Mikko Kivelä** — Assistant Professor, Computer Science / network science, Aalto — mikko.kivela@aalto.fi ~ — profile
  Link: **multilayer networks**, computational social science — layered/federated network structure (the federation strand).

Appendix — strongly linked, but outside Greater Helsinki

Flagged because the link is unusually strong; included only for reference (not in the counts above). Verify affiliations before contacting.

- **Maija Setälä** — Professor, Political Science, **University of Turku** — *deliberative democracy, citizens' assemblies, sortition* — the leading Finnish scholar on exactly the citizen-assembly model Hoapa networks. (turku)
- **Kaisa Herne** — Professor, Political Science, **Tampere University** — *experimental deliberation, fairness, social choice*. (tampere)
- **Kimmo Grönlund** — Professor, **Åbo Akademi (Turku)** — *deliberative mini-publics, Citizens' Assembly experiments*.
- **Antti Kuusisto** — **Tampere University** — *logic in computer science, modal/team logic, descriptive complexity* — a logic ↔ CS bridge, former UH Logic Group affiliate.
- **Sara Negri** & **Jan von Plato** — proof theory — now mainly **University of Genoa** (still carried on the UH portal; listed above under UH with that caveat).
- **Turo-Kimmo Lehtonen** — Professor, Sociology, **Tampere University** — *economic sociology, valuation studies, STS* — was long at UH/Tampere region.

Notes, caveats & suggested next steps

1. **Inferred emails (~) need a quick check.** UH addresses are mostly `firstname.lastname@helsinki.fi`, but several real ones use a middle initial (e.g. `Pekka.A.Makela`, `timo.pa.miettinen`, `jukka.k.nurminen`) — so an inferred UH/Aalto address may be slightly off. All **Aalto** emails here are inferred (their portal hides the address). Best practice: open the profile link, which carries the verified contact details.
2. **A few people have moved** (noted inline): Hytönen (→ Aalto), Negri/von Plato (→ Genoa). Their UH portal pages persist; treat with care.
3. **Where the project is genuinely thin locally:** *session types / process calculi / linear-logic-as-PL* has no strong Helsinki group — the closest are the verification (Heljanko, Junttila, Brzuska) and distributed-locality (Suomela, Hirvonen) people. If that leg is a priority, the strongest European groups are elsewhere (Glasgow, Imperial, Lisbon, Groningen).
4. **Highest-value first contacts, by area (my read):**
    - Math/logic: **Väänänen, Kennedy, Kontinen** (foundations); **Kupiainen, Kytölä** (field theory).
    - Philosophy: **Pihlström / Rydenfelt** (Peirce), **Mäki / Ylikoski** (TINT, interdisciplinarity), **Pantsar / Hartimo** (phil. of math).
    - CS: **Heljanko, Suomela** (concurrency/locality), **Roos** (information / MDL), **Raul Hakli** (multi-agent + social ontology — cross-cutting).
    - Social: **Teivainen, Palonen** (participatory/agonistic democracy), **Luhtakallio / Eranti** (civic sociology), **Vartiainen** (mechanism design); plus **Maija Setälä** (Turku) if you relax the region.
5. **Method:** names verified against the UH research portal (`researchportal.helsinki.fi`) and Aalto portal (`research.aalto.fi`) on 2026-06-11; person-specific links combine portal "Fields of Science" / bios with domain knowledge. ~10 names (logic-group postdocs/doctoral researchers, Heljanko, Kivinen) are listed from group pages with inferred emails.
