University of Helsinki contacts linked to Hoapa concepts

Generated: 2026-06-11. Source: University of Helsinki People Finder API (`https://www.helsinki.fi/en/api/people`) and the linked official People Finder profile pages.

Method note: liberal first-pass list, deduplicated by official University profile URL and filtered to academic/research/teaching roles. The topic notes are inferred from each person's official field-of-science metadata plus the Hoapa concept cluster: ModalHoTT/cohesion, category/topos/sheaf/descent, adjunctions, operads/moduli, concurrency/session types, formal methods/AI/data systems, and social-philosophical questions of communication, trust, legitimacy, collective inquiry, care, education, and institutions. This is not guaranteed exhaustive.
